YASH VERMA

FULLSTACK BLOCKCHAIN ENGINEER AT RTSN

📞 +91 9098971941 | ✉ VERMAYASH1881@GMAIL.COM | 🔗 LINKEDIN | GITHUB | 🌐 PORTFOLIO

PROFESSIONAL SUMMARY

Yash Verma is a full-stack blockchain developer with over 3 years of expertise in Web3 and the MERN stack, specializing in building secure, scalable DApps. Driven by a passion for innovation, Yash plays a key role in advancing blockchain technology, consistently delivering impactful projects. Explore his work on GitHub or portfolio.

SKILLS

Languages: Solidity, JavaScript, TypeScript, Python
Technologies: React, Redux, Next.js, Node.js, Express, Tailwind, Shadcn, Material UI, REST, MongoDB, GIT, Thirdweb, Moralis, Alchemy, ethers.js, remix, Hardhat, EtherJs, web3.js,
Interests: Web3, Blockchain, Artificial Intelligence, Metaverse, DevOps

WORK EXPERIENCE

Fullstack Blockchain Engineer, RTSN   2022 - Present, 2 years+
- Developed full-stack features; integrated on-chain functionalities to enhance platform performance.
- Added NFT royalty module, significantly increasing platform revenue.
- Build gamification strategies; boosted user engagement and active users by 55
- Technologies: NextJs, MUI, React, NodeJs, MongoDb, Express, Thirdweb, Alchemy, Rainbowkit, MagicWallet...
- **Check more here...**

Fullstack Engineer, Travelmorre   2021 - 2022, 1 year
- Developed responsive UIs with Next.js, CSS, JavaScript; optimized cross-device user experience.
- Added tailored components to enhance platform usability.
- Build and deployed scalable backend using NodeJs, Express, MongoDB.
- Targeted performance issues, improving load times and user satisfaction.
- Technologies: NextJs, React, NodeJs, MongoDb, Express, Tailwind
- **Check more here...**

SELECTED PROJECTS

Token Exchange Dapp: GitHub, Live here.

- Developed a decentralized application for seamless token trading on Ethereum.
- Added features for deposit, withdrawal, and order placement.
- Technologies: Solidity, Hardhat, Next.js, Tailwind, TypeScript, Redux, Ether.js.

Crypto Soundbox: GitHub, EthGlobal, Live here.

- Built a DApp for instant transaction alerts with MetaMask integration.
- Targeted security and privacy, added real-time notifications, detailed logs, and analytics.
- Technologies: Galadriel, Rainbowkit, Solidity, Hardhat, Next.js, Tailwind, TypeScript, Redux, Ether.js, Shadcn.

BioDrop: GitHub, Live here.

- Contributed to an open-source project under EddieHubCommunity.
- Developed UI for JSON file uploads to update profiles.
- Technologies: Next.js, Tailwind, MongoDB.
